

## LANDSCAPE PHOTOGRAPHY

***We offer an ever-changing selection of landscapes from all over the United Kingdom, all at prices you can afford.***

These are sold as either mounted (ready for framing), or framed, either in a basic commercial frame, or in a recycled wooden frame, thus allowing us to offer these photographs at very reasonable prices.

***Photographs are displayed in our window at Forest Books, and duplicates can be printed to order (up to 7 day delivery). Any photograph can be supplied at any of the sizes shown opposite, either mounted or framed.***

Prices range from £3.95 for a mounted 4" X 6" print, to £24.95 for a framed A3 print.

All photographs are printed digitally on a professional printer, and are guaranteed against fading or discoloration.

*All our photographs are taken by Sylvan Photography*

## BESPOKE PHOTOSHOOTS

***We offer a bespoke service for photography in your own home or business. This may be for portraits, family groups, or photographs of your own home and garden etc, or for any other needs.***

I like to use natural light as far as possible, particularly for portraits, as that produces more natural results. However, I also make use of a couple of photofloods when appropriate.

The cost of this service is £65 per hour inclusive, if in the locality of Uppingham or Leicester.

*For this you get a selection of up to 24 small edited printed proofs of the pictures I have taken, from which you can select those you would like prints of.*

Prints, either monochrome or colour, are available at the following prices:

	Unmounted	Mounted
6" X 4"	£2.45	£3.95
7" X 5"	£3.45	£5.95
A4	£5.95	£9.95
A3	£7.95	£12.95

To make a booking, call in at the shop or phone 0116 2887457

## OLD BLACK & WHITE NEGATIVES

Do you have any old black & white 35mm negatives that you would like prints from? We can scan these and print them digitally.

The cost is £2.50 per photograph, plus cost of prints.

## PHOTO ENHANCEMENT

***If you've taken some digital photographs that haven't turned out very well, they may well be recoverable.***

If they're too dark, they can be lightened. If they're too light they can be darkened. Intruding items can be removed, contrast and colour improved, and what may appear to be a hopeless photograph can often be transformed into at least an acceptable one, and in some cases, a superb one.

We charge from £3.75 per photograph for this service. The photograph needs to be supplied on a CD or a memory stick, and the improved version will be supplied on the same medium. Prints can also be supplied (see bespoke prices overleaf).

*No charge is made if we can't significantly improve the photograph*

## PHOTO RESTORATION

**We also offer a print restoration service.**

If you have any old family photographs from yesteryear that have become creased or marked, we can restore them to their original state (or even better) and provide you with as many copies of them as you wish. We can also colour them.

The cost of renovation is just £9.95 per photograph. This price includes one print 7" X 5". Additional prints can be supplied (see bespoke prices overleaf)

Colouring costs £4.95 per photograph. Or you can combine the two processes for just £12.95 per photograph

All photographs are printed digitally to archival standard on a professional printer, and are waterproof and will not fade or discolour. If you require basic copies of them, we can produce these in the shop on our colour copier at 70p per A4 copy, or 99p per A3 copy. These too are waterproof, but are of lower quality and not guaranteed against discoloration over time.
